All Mayco Stoneware glazes are dinnerware safe when used according to manufacturer's directions, except where noted by the "Not Dinnerware Safe" icon. This may be due to surface durability or texture of fired surface.

STONEWARE CLASSIC

Stoneware glazes offer the depth, sophistication and reliability to artists working from mid-range to high-fire temperatures. Many glazes will break over textures, revealing secondary colors and shades. The choice of clay body, thickness of glaze application, firing process and temperature will affect the fired results.

CLASSIC & MATTE TIPS

- Mayco glazes are user-friendly in application, layering and firing.
- Used alone, stoneware glazes produce beautiful color variations; one coat will allow the clay body to show through the glaze and two to three coats deepen the color.
- SW-136 Weathered Blue, SW-137 Storm Gray, and SW-138 Lemon Meringue are unique glazes that change in appearance with number of glaze coats. One coat will display more color while additional coats will increase mottling and white variegation.

SW-166 Norse Blue over SW-168 Coral Sands

STONEWARE MATTE

Choose from solid shades to those that create interesting color variation as they move and break. Application thickness is key to making mattes work for you.

SW-181
Night Moth

SW-189
Cenote

CRYSTAL TIPS

- Crystal glazes are designed to expand upon the surface with dazzling bursts of color.
- Crystals will settle to the bottom of the jar and will need thorough mixing prior to initial use and in between each coat.
- Apply two to three coats using a fan brush. While the glaze is wet, use your brush to redistribute crystals to achieve balanced coverage. Over-application of the crystals can cause pinholing or running.
- Crystals can create movement. Avoid having a heavy concentration of crystals near the bottom of your piece.

STONEWARE GLOSS

Stoneware Gloss glazes can be used in design, all over coverage and are the ideal product for intermixability at mid-range temperatures. The integrity of your design will remain unchanged as these glazes are incredibly stable and will not move or combine with surrounding colors.

SW-501
White Gloss

SW-502
Yellow Gloss

SW-503
Orange Gloss

SW-504
Red Gloss

SW-505
Purple Gloss

STONEWARE CLEAR

SW-001
Clear

SW-002
Matte Clear

SW-004
Zinc-Free Clear

Mayco Stoneware Clear Glazes will preserve and enhance the surface of your work.

CLEAR TIPS

- **SW-001 Clear** is formulated to reach high fire temperatures up to cone 10.
- **SW-002 Matte Clear** fires to a satin matte finish at cone 5/6 and will become more satin at cone 10.
- **SW-004 Zinc-Free Clear** is designed for use on products containing chrome-based pigments to ensure that you will get a smooth and clear surface.

STONEWARE SPECIALTY

Stoneware specialty glazes were developed for special effects and surface depth.

SW-149
Crackle White

SW-003
Crackle Matte Clear

SW-403
White Mudcrack

SW-404
Black Mudcrack

SW-405
Light Magma

SW-406
Dark Magma

CRACKLE TIPS

SW-149 Crackle White and SW-003 Crackle Matte Clear are developed for mid-range firing temperatures where a fine crackle pattern will develop with 2-3 coats. To highlight the crackle pattern, after firing, wipe black acrylic or ink over the ware and wipe off, allowing the ink to fill the cracks.

MUDCRACK TIPS

SW-403 White Mudcrack and SW-404 Black Mudcrack were developed to create a highly-texture raised and cracked surface. The thicker the application, the more textured the surface. Mudcrack can be directly applied to bisqueware or in combination with other mid-range glazes.

MAGMA TIPS

SW-405 Light Magma and SW-406 Dark Magma were developed to create a rough, cratered surface. The thicker the application, the more textured the surface will be. Magma can be directly applied to bisqueware or in combination with other mid-range glazes.

Visit MaycoColors.com for additional application details and tips.

SW-403 White Mudcrack over SW-505 Purple Gloss

WORKING WITH FLUX

Light Flux and Dark Flux are flowing glazes intended for use with other stoneware glazes to enhance movement, promote reactions and add interesting effects. Apply 2-3 coats under or over another mid-range glaze to bring about "hidden colors".

SW-401
Light Flux
(over SW-119 Cinnabar)

SW-402
Dark Flux
(over SW-119 Cinnabar)

CONE 6 RESULTS

SW-128 Cordovan over SW-401 Light Flux

SW-401 Light Flux over SW-145 Tea Dust

SW-402 Dark Flux over SW-108 Green Tea

CONE 10 RESULTS

SW-510 Blue Gloss over SW-401 Light Flux

SW-402 Dark Flux over SW-110 Oyster

SW-402 Dark Flux over SW-165 Lavender Mist

Technique was achieved by brushing on two (2) layers of base glaze. Then apply two (2) layers of top glaze, letting glazes dry between coats.

WASHES

Mayco Washes are a multi-purpose product with limitless possibilities. These washes can be used alone for staining techniques or with any glaze from low-fire (cone 05/06), mid-range (cone 5/6), and up to cone 10. They are beautiful in oxidation or reduction and can expand the glaze palette for an artist or teacher. Mayco Stoneware Washes are highly concentrated metallic glaze colorants formulated for ease of use and versatility. Washes are not dinnerware safe unless used in combination with clear or another glaze that creates a sealed and chemically durable finish. 

SW-301
Iron Wash

SW-302
Rutile Wash

SW-303
Manganese Wash

SW-304
Copper Wash

SW-305
Cobalt Wash

WASH TIPS

- Formulated for ease of use and brushability.
- Washes can be applied in a variety of ways, but are often painted into textured areas and wiped away on the higher surface to accentuate the texture.
- Can be fired from cones 06 - 10. Chips shown are fired to cone 6.

Dry Glazes

Visit MaycoColors.com for additional resources.

Use Mayco Stoneware Dry glazes (SD-#) for fast dipping and layering, creating natural flowing effects. Fine and uniform particle size and a thorough dry mixing process make Mayco Stoneware Dry glaze consistency so perfect that sieving is optional. Available in 5 lbs. bags with volume pricing available. Contact your Mayco Distributor for details.

Stoneware Glaze Assortment Kits

Mayco Stoneware Glaze Assortment Kits offer a variety of colors, finishes and endless possibilities for glaze combinations. The kits are value priced in sets of six wide mouth pint jars and are perfect for the studio or classroom.

Visit MaycoColors.com for available Stoneware kits.

LOW-FIRE GLAZES AT MID-RANGE

Artists can incorporate and combine other Mayco products with Stoneware glazes at mid-range (cone 5/6) temperatures. Cone 6 color performance can be found on the left side of the low-fire glaze label. Visit MaycoColors.com for more information on low-fire glazes at mid-range.

Stroke & Coat®

Many Stroke & Coat® glazes perform well at mid-range. Darker colors such as red, orange, yellow, blue and green may darken compared to their cone 06 results. Lighter colors such as tan, purple and pink will fade.

SC-33 Fruit of the Vine and SC-29 Blue Grass trailed under SW-143 Abalone

Elements™

Many Elements™ and Elements™ Chunkies create beautiful effects when used with stoneware at mid-range. Elements™ will be quite fluid and move during the firing process so keep away from the bottom of the ware.

EL-149 Lavender Flower over SW-110 Oyster and SW-134 Eggplant on the rim

Jungle Gems™

Jungle Gems™ glazes perform at mid-range for very interesting results. Crystals will have additional movement at higher temperatures and will act more as a blending agent.

CG-992 Mint Chip over SW-144 Lava Rock

Designer Liner

Designer Liner enables artists to achieve crisp, non-moving linework from cones 06 - 6 temperatures. To ensure sharpness in line quality, use a non-moving translucent or clear glaze over the top of Designer Liner.

SG-401 Black Designer Liner, SW-119 Cinnabar and SW-001 Clear

STONEWARE GLAZE COMBINATIONS

Artists can achieve incredible finishes with a simple combination of two glazes. Visit MaycoColors.com for more Stoneware glaze combinations and inspiration.

Stoneware Glazes at Cone 10

Mayco Stoneware glazes are intended for use at cone 5/6, but many are also pleasing and stable at cone 10 oxidation, reduction or other alternative atmospheric firing conditions. Always test prior to use.
